## INDIA REDUCES PRECIOUS METAL WASTAGE LIMITS FOR JEWELLERY EXPORTS BY HALF

Indian government tightens regulations on gold, platinum, and silver wastage in exported jewelry. Wastage limits reduced to 0.5% for plain gold and platinum, and 0.75% for studded jewelry from higher previous limits. Updates apply to export norms under the Handbook of Procedures, 2023.

The new rules stipulate that the weight of imported gold or silver mountings and findings used in exported products will be excluded from calculating the net precious metal content

The wastage allowance for medallions, coins, and similar items is now 0.1%, reduced from 0.2%. Concerns were raised by a gems and jewellery industry representative about the impact on small exporters. The DGFT also adjusted the Standard Input Output Norms (SION) for precious metals in exported jewelry.

# EXPERT PANEL TO EVALUATE NUTRACEUTICAL PRODUCTION IN PHARMA PLANTS

India's drug regulator has set up a five-member committee to decide if nutraceuticals can be made in pharmaceutical manufacturing facilities. The committee includes officials from the regulatory authority, NIPER experts, and an industry representative.

They have three weeks to provide recommendations on the matter following concerns about violations of manufacturing norms.

A committee will review pharmaceutical industry associations' request to allow nutraceuticals production in drug manufacturing facilities following objections to the current stance. The Federation of Pharma Entrepreneurs expressed concerns over potential impacts on exports and small enterprises.

Rules prevent facilities approved for drug manufacturing from producing other products under revised Schedule M. The expert committee's report will inform the regulator's approach to managing nutraceutical-drug manufacturing overlaps.
